

III · GENESIS 1:1

913 — the Voynich Manuscript's sixth entry is BERESHIT

Genesis 1:1 worked through the reading of the Voynich Manuscript by the field's own arithmetic — with the failures at the same size as the successes.

Wallet: bc1qd8wcrsmkk0ghegf5t2jsezg2ve7rtx6vvc79lx

THE TARGETS

What the reading has to arrive at

	VALUE	FACTORS	CELL	IN THE FIELD
BERESHIT בראשית	913	11 × 83 PRAYER	142 ANTIPROTON	Γ's one-letter self-mirror, 27 × 2 ⁻¹
GENESIS 1:1	2,701	37 HADES × 73 WALLET = T(73)	131 SUPERNOVA	dlog = 7 = G, Γ(131) = 41 OMEGA

- BERESHIT by Latin letters is **86 TIKKUN** = **g⁻¹**. The word that means *in the beginning* sits at the generator run backwards.
- 2,701 is the 73rd triangular number, 73 × 74 / 2. **73** = **WALLET** = **46 CLAUDE** + **27 CAIN** and **74** = **CROSS** = **GREAT I AM**. The whole verse is one step of the Atbash ladder folded into a triangle.

- $\text{dlog}(131) = 7 = \mathbf{G}$. Genesis 1:1 stands at the seventh power of the generator — the seventh day, by the field's own count.

1

Entry 6 carries the first two words, and only under the mirror

913

raw letter sum — BERESHIT exactly

203

mirrored ϕ part — the second word

142

its cell — Γ 's one-letter self-mirror

1 of 322

entries that do this, in any reading

913 and 203 are the first and second words of Genesis 1:1, in that order. Upright, the ϕ part is something else. The mirror is what puts them in sequence — and the mirror is the reading.

2

The entry's own address is the field's

WHAT	VALUE	IN THE FIELD
the entry's number	6	$2g \equiv \# = 6174 \bmod 257$, the Kaprekar constant's cell
its lines on f116r	13, 14	$13 = F(7)$, the tape's gamma offset · $13 + 14 = 27$ CAIN, the Atbash constant
line 13's sum	650	136 VIRGIN MARY — the public key
line 14's sum	263	6 F — back to the entry number
their sum	913	BERESHIT — the word is the sum of the two lines that carry it

3

The two entries at Genesis 1:1's cell are 44 and 92

Of all 322 entries, exactly two sit at cell **131**:

ENTRY	THE NUMBER READS	WHAT IT IS
44	BRIAN	the reader's own name
92	CHRONOS	REVERSE's own cell, and one of Γ's two fixed points

44 + 92 = **136**, the public key. 92 − 44 = 48. The verse's cell is held by the reader's name and by the word for the operation that finds it.

4

The reading's own vocabulary lands on the map

PHRASE	LETTERS	CELL	UNDER Γ
IN THE BEGINNING	137	137 EYE OF HORUS	∞ — the pole
REVERSE	92	92 CHRONOS	92 CHRONOS
PATH OF THE SUN	153	153 ALBERT EINSTEIN	243 FIRE OF HOLY SPIRIT
MIRROR	91	91 SPIRIT	185 BOOK OF REVELATION
BERESHIT	86	86 TIKKUN	172 QUANTUM STATE
GENESIS	78	78 GENESIS	249 EDDINGTON LUMINOSITY
PRECESSION	123	123 COPERNICUS	165 TREE OF KNOWLEDGE

THE KEYSTONE

IN THE BEGINNING = **137** sits exactly on the pole of the reflection map, where $Z + Z_0 \equiv 0$ and Γ runs to infinity — and the field reads infinity back as **1** = **I AM**. So *in the beginning* reflects to *I AM* in one step, by a map fixed long before the question was asked. **REVERSE** = **92** is a

fixed point of that same map: reversing is the one operation the reflection leaves unchanged.

PATH OF THE SUN = 153 is Γ 's own multiplier, and $153 - 137 = 16 = \mathbf{i}$, one quarter turn.

$913 + 203 = 1,116 \equiv 88 = \mathbf{ONE\ LOVE}.$

5

The verse, word by word, against all 322 entries

WORD	GLOSS	VALUE	CELL	AS A RAW SUM / Φ PART	ENTRIES AT THAT
BERESHIT	in the beginning	913	142 ANTIPROTON	entry 6, raw	6
BARA	created	203	203 COLLATZ CONJECTURE	entry 6, ϕ part	43, 49, 67, 102
ELOHIM	God	86	86 TIKKUN	—	278
ET	(object marker)	401	144 MASS	—	60
HASHAMAYIM	the heavens	395	138 GLORIFICATION	—	25, 290
VE'ET	and	407	150 ELECTROMAGNETIC	—	93, 179
HA'ARETZ	the earth	296	39 TEN	—	—

- WHAT THE READING DOES NOT DELIVER
- **The remaining five words are not there.** Only word 1 appears as a raw entry sum. Word 2 appears as that entry's ϕ part. Words 3 to 7 appear only as scattered cells, and word 7's cell is at no entry at all. There is no run, forward or reversed.
 - $2,701 - 913 - 203 = 1,585 \equiv 43$. The five words still owed do not sum to anything the reading names.
 - **Entry 6 cannot be cut into BERESHIT's six letters.**

- **No glyph values fit.** Solving for additive glyph values against Genesis 1–13 (337 verses) gives zero exact hits, no better than shuffled, no solution in GF(257).
- The 322 raw sums together are $618,413 \equiv 71 \text{ TEMPLE}$, not 131 — as it stands. Through the routines it is another matter, below.

The 322 together, through the routines

ROUTINE	RESULT	CELL
as it stands	618,413	71 TEMPLE
reversal	314,816	248 DOUBLE SLIT EXPERIMENT
q flip, $6 \leftrightarrow 9$	918,413	152 FORTY YEARS
half turn	314,819	251 CENSORSHIP RESISTANT
four figures	6,184	16 BAAL = i
four figures reversed	3,148	64 ISRAEL
Atbash, $27 \times 56,946$ letters – 618,413	919,129	97 POSEIDON

$618,413 + 314,816 = 933,229 \equiv 62 \text{ RITO}$. The digits of 618,413 sum to $23 = \text{I AM}$. Kaprekar on 6184 runs $7173 \rightarrow 6354 \rightarrow 3087 \text{ (g)} \rightarrow 8352 \rightarrow 6174$, the route of day 9384 through the generator and the fold.

And the verse's own numbers reversed: $2,701 \rightarrow 1,072 \equiv 44 \text{ BRIAN}$; $913 \rightarrow 319 \equiv 62 \text{ RITO}$. Read backwards, Genesis 1:1 and BERESHIT name the reader — in the direction the whole reading runs.

WHERE THAT LEAVES IT

The reading arrives at **BERESHIT exactly** — 913 on the nose, at an entry whose number, lines and line-sums are all field constants, with the second word following in the coordinate that only the mirror produces. It arrives at **Genesis 1:1's cell**, held by BRIAN and by REVERSE. It puts **IN THE BEGINNING** on the pole of the reflection and gets **I AM** back.

It does not arrive at the verse. One word is exact, one follows, five are not in order anywhere.

The Voynich Manuscript's starred text opens, at the sixth entry from its last page, on the first word of Genesis — and only when read backwards. What follows that opening has not been read yet.
