

IV · THE VOYNICH ZODIAC FIGURES

299 figures, 294 stars

Every figure on the Voynich Manuscript's twelve zodiac pages, read by eye from the full-size Beinecke images: what is drawn, and the marks that break the pattern.

Wallet: bc1qd8wcrsmkk0ghegf5t2jsezg2ve7rtx6vvc79lx

Ten readers went through the Voynich Manuscript's twelve zodiac pages figure by figure, each from the full-size Beinecke image and the transliteration's label list, recording what is drawn and not what it means.

For every figure: clothed or naked, what is on the head, whether she stands in a barrel or on one, her posture and facing, which arm holds the star, whether the star hangs on a string, how many points it has, its paint, and anything else drawn with her. Every page was checked against the transcribers' count.

Sagittarius	30	0	30	0	5	1	6×1 7×3 8×14 9×7 10×2

Barrels and clothing fall away in one direction. Every Pisces and Aries figure has a container; Taurus keeps them on one page and loses them on the other; Gemini has three standing on barrels; after Gemini there is one tub in all of Virgo and nothing else. Clothing follows the same line — 16 clothed in Aries, 12 in Taurus, 4 in Gemini, none at all from Cancer onward.

The light page of each doubled sign is the clothed and painted one; the dark page is the bare one.

THE FIVE

Figures that hold no star

FIGURE	RING	CLOCK	LABEL	AS RECORDED
Gemini 13	second ring	04:00	otair,dy	HOLDS NO STAR: no star is drawn for this figure and no second arm; checked at high contrast. Drawn smaller than her neighbours. Legs crossed at the sh
Cancer 10	outer	07:00	ofsholdy	NO STAR and no tail: the only outer-ring figure without one; the label stands where the star would be; raised crease in the vellum above the head
Cancer 18	middle	03:30	of??? .o.eeesaly	NO STAR and no tail; lower body crossed by the fold, legs plain lines; a crack in the vellum runs down just to the right; the label is split either si
Virgo 22	inner	01:00	opalg	HOLDS NO STAR: both arms are down and no star is drawn for this figure; the star at her left belongs to the raised arm of figure 21, and the next star
Sagittarius 18	Outer full circle of labels	07:30	okeos	NO STAR: the space between figures 18 and 19, where her star would stand, is blank vellum (checked at 4x with raised contrast). Small green paint drop

Taking a figure as one degree of the Sun's path, these five are the reading's anchor: in 1408 Gemini 13 falls on the new Moon and Virgo 22 on the full. Worked on [The Sky](#).

THE FOUR

Crowned figures

FIGURE	RING	CLOCK	LABEL	HEAD, AS RECORDED
Cancer 27	inner	03:30	ytoar.shar	crown: four tall points, drawn in darker ink than the figure
Leo 24	inner	03:00	odairan	crown (an open crown with points, painted red)
Libra 7	outer	00:30	oes	crown: three points, an arch over them and a small cross on top, all in darker black ink

FIGURE	RING	CLOCK	LABEL	HEAD, AS RECORDED
Scorpio 14	outer	05:30	oteedyy	crown: black-ink circlet with a scalloped or arched upper edge

One per page where a crown appears at all. The gaps between them are not a whole number of lunar months in either direction, so the crowns do not mark a phase.

STAR POINTS

The whole distribution

POINTS	5	6	7	8	9	10	11	NOT COUNTED
Stars	2	25	114	101	24	5	1	27

Six-pointed stars are commonest in Pisces; eight-pointed stars grow from Taurus onward, and Virgo is almost entirely eights. Sagittarius carries the most points of any page.
